AFFAIRS OF THE DISTRICT

Protest Against an Assessment Levied for Resetting Curb.

Reply of the Engineer Commission. er-Poles to Be Condemned-The Removal of a Tree on Parking Space Uninvorably Considered.

Messrs, Hufty & Hufty, of the Columian Building, recently entered a protest gainst the assessment for resetting the orb adjacent to lot A. square 286. They equested a reconsideration of the de-sion recently made by the Board and eference of the matter to the Attorne, ubject. The special assessment clerk, to whom the letter of the Messrs. Hufty was referred, has submitted the followng statement:

The act of August 7, 1894, authorized assessments for new curb and it would been only reasonable to suppose that it is ntended to confer authority to levy assch information is strengthened by the fact that said act authorizes assessments or improving and requiring alleys and sidewalks and provides as follows:
"When new sidewalks or curbing are

ereafter required to be laid on streets eing improved, one-half of the total cost shall be assessed against abutting property, in like manner and under the law governing in the assessment and permit the Commissioners to the matter of as-

eys and sidewalks?" Capt. Lansing H. Beach, the Engineer Commissioner, in considering the matter, has forwarded to his associates his views

Commissioner, in considering the matter, has forwarded to his accociates his views upon the question as follows:

"The point made by Messrs, Harry & Harry is that no assessments can be, made for resetting curb. They evidently base their contention on the provision contained in the appropriation act approved March 5, 1886, which stytes.

"That when new sidewalks or curbing are hereafter required to be laid on streets being improved, one-half of the tetal cost shall be assessed against abutting property in like manner and under the law geveraing in the case of compaisory perint work, etc.

"It appears, however, that the assessment was not made under this law, but that the curbing was reset in connection with the laying of a new sidewalk under the assessment and permit law approved August 7, 189, which authorizes the Commissioners to improve and repair sidewalks and to construct sidewalks of such form and material as they may determine, upon giving a prescribed notice by advertisement, which notice shall give the location and kind of work to be done, the kind of materials to be used and the estimated cast of the improvement, one-half of the total cost of the work to be assessed pro rata against the abunting property.

"It is believed that their contention be

the work to be assessed pro rata against the abutting property.

"It is believed that their contention is not well taken, and it is suggested that they be informed to this effect, and that the Commissioners do not consider it necessary to refer the matter to their attencey. It is suggested further that if they wish to bring their point up in a case the matter then can receive judical interpretation.

It is understood that the views of the Engineer Commissioner will prevail with the Board, and that the attorneys will be so informed.

The Anacostia and Potomac Railroad Company receivity requested a permit to replace 125 wooden poles on their right of way on Nichols Avenue, from Sheri-dan Avenue, Hillsdale, to Hamilton Avenue, Congress Heights. The matter was considered in board meeting and there decided that the request would be grantand were painted a dark green color and pointed or rounded at the top. After the permit was issued and the work of erecting the poles had com-menced the Electrical Engineer reported

menced the Electrical Engineer reported to the Commissioners that the poles being set did not come up to the contituous named by the Commissioners. Some of the poles, it was said, had been condemned by the inspector, and others were rough and the rounding at the top was not well done. He asked instructions from the Commissioners as to what course to pursue under the circumstances. He was instructed yesterday, through the Engineer Commissioner, that the conditions named by the Commissioners were made, as far as possible, for the accommodation of the company, and were as theral as could be allowed. He were as liberal as could be allowed. He was told that the poles should conform to the conditions named, and all poles that do not should be promptly condemned. The Engineer Commissioner recommended that the company be informed of the instructions given to the Electrical Engineer.

Capt. Bowman H. McCalla, U. S. N. recently requested the removal of a tree from the parking in front of premises at the northwest corner of Massachusetts Avenue and Twentieth Street northwest. The ground for the request was that this tree retards the growth of the row of trees at the curb, and that it prevents the proper grading of the parking.

After investigation and report by the Superintendent of Parking the Engineer Commissions has forwarded the archi-

Superintendent of Parking the Engineer Commissioner has forwarded the application to his associates with the following statement:

"The tree which it is desired to remove is one of the row of indens placed back of the sidewalk. Massachusetts Avenue being provided with a double row—one at the curb and the other back of the sidewalk. The tree in question is one of the linest of the row, and it is believed that the symmetry of the line should not be marred nor should as large and imperiant a tree as this be unnecessarily sacrificed. It is, therefore, recommended that the applicant be informed that it is considered inadvisable to grant his request for the reasons stated."

M. E. Knorleine residue at the correct

North Capitel and Patterson Streets, cently addressed the Commissioners, re-lesting thir early attention to the payig of Patterson Street northeast. The knorledge has been ordered to by Mr. Le opinion that the street should be nacadamized, and he recommends that he same he ordered from North Capitol Street eastward about 500 feet. The employer than the same he ordered from North Capitol Street eastward about 500 feet. The employer saws that the roadway is solidly said, and he thinks that if his recommendation is adopted that the street will be not in fact-class condition. Capit H. C. Newcomer, assistant to the number Commissioner, in forwarding he report to the beard recommende that he work in question he not undertaken I the present time. He suggests that he minder repairs as may be needed hall be made, and that the street should eleft with that for a while. He states hat shollar work him been recommended several localities where it is ursently called, and that they should be looked for first.
